

# mineglow | Tunnelling

**Guaranteed** to go the distance

The **longest LED strip**  
for tunnel construction

# Australia's longest industrial LED strip

MineGlow's reliable x-Glo LED strip lighting systems provide daylight conditions to keep your workforce safe and your projects on track.

\*Between power sources

## A robust, continuous lighting solution for tunnel construction

MineGlow's LED lights provide floor-to-ceiling illumination along the entire tunnel, eliminating shadows, glare and hazardous dark spots to improve visibility and help your team work more safely.

With run lengths of up to 168 metres between power sources, you can meet the ever-changing requirements of your tunnelling environment, even when there is limited access to power.

Reduce installation time and relocate easily

Reduce infrastructure and costs

Improve traffic management and zone identification

Improve illumination and visibility

Customise to suit your project needs

Improve energy efficiency and sustainability

## Suitable for all tunnels

- Tunnel construction
- Railway tunnels
- Cut and cover tunnels
- Immersed tunnels
- Road tunnels
- Pedestrian tunnels
- Underground rail tunnels

# Intelligent Design

Our lights go the distance, from fully-portable construction solutions to permanent infrastructure.

**Zero maintenance**  
Unconditional 5-year warranty and expected life span of up to 10 years

**Low profile and flexible design**  
for easy installation on any surface while providing 180-degree floor to ceiling visibility

**Rapid installation and relocation**  
Fast to install and easy to relocate as your tunnel construction moves to next stage

**Customisable**  
Fully customisable for any length

**Robust hardware**  
100% waterproof, flame retardant, impact and shock resistant

**Back up power supply**  
Guaranteed continuity where there is limited access to power, even if an end is severed

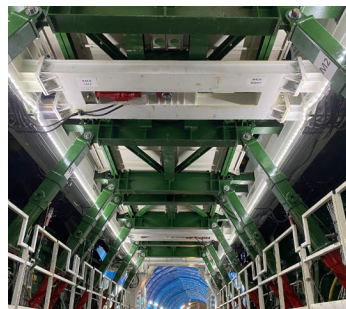

**Sustainable design**  
Low energy, 6500K high brightness SMD LED chips technology available in 24V, 36V, 48V AC/DC

## Tailored solutions for any project

Four, fully customisable LED strip options in multiple colours and configurations to meet your specific requirements.

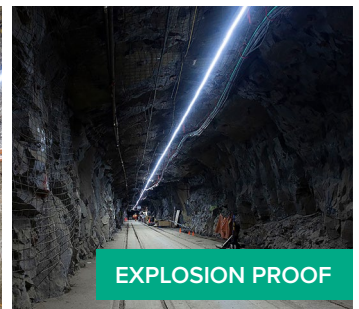

Emergency lighting

Long range

Standard range

Exm range

## Our promise

MineGlow solutions meet our stringent commitment to quality, safety and sustainability. Our QSS commitment underpins our reputation for excellence in everything we do, from research and development to customer service and support.
